EDUCATION

Bachelors in Computer Science

FAST National University of Computer and Emerging Sciences

2019 - 2023

PROJECTS

SportiX (FYP)

- SportiX is a mobile and web-based app designed to streamline sports department operations at FAST NUCES. It simplifies the process of managing sports activities for administrators.
- The app offers an online platform for administrators and students. Administrators can efficiently manage sports activities, while students can stay informed about all sports events.
- SportiX is built using React, a popular JavaScript framework.

Covid Screening App

- The Covid Screening App is a frontend web app that assesses COVID-19 status through a questionnaire and provides preliminary guidance, but it should not substitute professional medical advice.

Dictionary, Spell Checker

- This project was developed using C++ that uses the core concepts of Data Structures.

Covid-19 Control Unit

- A Semester Project developed C++ user registration/login system with the .NET framework. Enabled COVID-19 stats. Implemented multiple user types and seamless order delivery.

Hotel Reservation System

- A Database Semester project developed using C# that enables users to reserve rooms within a hospital facility.

Hospital Management System

- A project using C++ with the help Object Oriented Programming Concepts. In this project, patients can book appointments, and update information, and doctors can manage patients data.

WORK EXPERIENCE

Frontend Developer Intern

Interns Pakistan

08/2022 - 10/2022

Achievements/Tasks

- The Covid Screening App is a frontend web app with a questionnaire to assess COVID-19 status based on symptoms, exposure, and risk factors
- It provides a preliminary evaluation and offers guidance on recommended actions, such as testing or self-isolation.
- Professional medical advice should always be sought for accurate assessments and further guidance
