EDUCATION

Bachelor in Computer Science

FAST National University of Computer and Emerging Sciences

2019 - 2023

EXPERIENCE

Frontend Developer Intern

Interns Pakistan

08/2022 - 10/2022

Pakistan

Tasks

- The Covid Screening App is a frontend web app with a questionnaire to assess COVID-19 status based on symptoms, exposure, and risk factors
- It provides a preliminary evaluation and offers guidance on recommended actions, such as testing or self-isolation
- Professional medical advice should always be sought for accurate assessments and further guidance

CERTIFICATES

Frontend Developer Intern - Interns Pakistan

React JS- Complete Guide for Frontend Web Development - Udemy

WEB CAMP - Google Developer Student Clubs

FINAL YEAR PROJECT

SportiX (Sports Automation System) (01/2023 - Present)

- SportiX is a mobile and web-based app designed to streamline sports department operations at FAST NUCES. It simplifies the process of managing sports activities for administrators
- The app offers an online platform for administrators and students. Administrators can efficiently manage sports activities, while students can stay informed about all sports events happening at FAST NUCES
- SportiX is built using React, a popular JavaScript framework. This ensures a responsive and user-friendly interface for both mobile and web users
- The main goal of SportiX is to simplify the process of obtaining sports activity updates. By using the app, students and administrators can easily access the latest information about sports events at FAST NUCES

PROJECTS

Text Analyzer App

Text analyzer is an application developed in React app for text editing with case conversion, clearing, copying, word count, removing extra spaces, and error correction for spelling.

Covid Screening App

The Covid Screening App is a frontend web app that assesses COVID-19 status through a questionnaire and provides preliminary guidance, but it should not substitute professional medical advice.

Hospital Reservation System

A Database Semester project developed using C# that enables users to reserve rooms within a hospital facility.

Dictionary, Spell Checker

A project developed using C++ that uses the core concepts of Data Structures like LinkedList, Trees and Graphs.

Covid-19 Control Unit

A Semester Project developed C++ user registration/login system with the .Net framework. Enabled COVID-19 stats viewing, ordering, reporting, and inventory management. Implemented multiple user types and seamless order delivery.
